

Ready to work with AI?

GEAP 103 | September 23, 2026 | Speaking warm-up

1. Choose a question. Think about your answer.
2. Find a partner. Ask your question and listen. Ask the follow-up question too.
3. Answer your partner's question. Then find a new partner.
4. Try to speak with at least four people. You don't need to finish all eight questions.

You can stay seated and let partners come to you. You can pass on a question. You don't need to write answers. Keep passwords, sign-in codes, and private information to yourself.

1. Last week's success

Which part of setting up your GitHub account was easiest or hardest?

Ask more: What helped you finish?

2. Since our last class

Have you tried an AI tool since our last class?

Ask more: What did you try? If you haven't tried one, what would you like to try?

3. Where is my file?

Have you ever lost a file or had trouble finding one?

Ask more: What did you do next? If this hasn't happened to you, what would you try?

4. Before you send it

AI writes an email for you. What would you check before sending it?

Ask more: Why would you check that?

5. A clearer request

You ask AI, "Make this email better." What could you add to make your request clearer?

Ask more: How would you say the new request?

6. Before you say yes

AI wants to change several files. What would you want to know first?

Ask more: What question would you ask AI?

7. Asking for help

You're stuck on a computer task. What would you say to ask a classmate for help?

Ask more: What would your classmate need to know about the problem?

8. Today's goal

By the end of today, what would you like to be able to do?

Ask more: What could you show someone to demonstrate it?

Useful phrases

"For me, ..." | "I'd try ... because ..." | "Could you give an example?"

"Do you mean ...?" | "I'm not sure yet. What do you think?"

Back together: Share one useful idea you heard. Then choose one thing you want to try today.
