

GEAP 103: Day 1

Your files and your wishes

FIVE USEFUL WORDS

Folder: a place to keep files.

File path: the steps through folders to a file.

File extension: the ending after the dot, such as .txt or .docx.

Cloud sync: when you change a file, OneDrive can update other copies.

Version: the file as it was at one time, before more changes.

Example path: Documents / GEAP 103 / Week 01 / notes.txt

A file you see on your computer may still need the internet to open.

A PLACE FOR YOUR COURSE WORK

Create these folders in Documents or OneDrive:

```
GEAP 103/  
  Week 01/  
  Week 02/  
  Goal Document/  
  Decision Logs/  
  Portfolio/
```

Save your writing in Goal Document.

Name the file Goal_Document_YourName.docx. Use your name.

YOUR FIRST WISHES

Write 3–5 things you wish a computer could do for you.

“I wish my computer could ...”

“It’d help me if I could ...”

“I want to learn how to ...”

Your wishes don’t have to be realistic. You don’t need to know how to make them happen yet. Your wishes can change.

TALKING ABOUT TODAY

Tell a partner or a large language model (LLM) what you did and one thing you want to learn. An LLM is a computer tool you can talk or write to.

With an LLM, say or paste: “I’m learning English. Ask me what I did with my files today and what I want to learn. Ask one question at a time. If I’m not clear, ask me to explain more. Let me do the explaining.”

With a partner, take turns. Ask “Where?”, “Why?”, or “Can you show me?”

BEFORE YOU GO

Write one sentence: what did your partner or the LLM ask you to explain more?

Check that you can find and open your Goal Document. Make sure you can get to it next class, especially if you’re using a school computer.
